□ Confidential — Do Not Redistribute

关于我们 · ABOUT NUCOREBIO

Who We Are — And Why This Formula Exists

Before you evaluate this formula, you need to understand one thing:

What you are holding is the result of years of dedicated research by our doctoral team — scientists who have spent their careers mastering Traditional Chinese Medicine and modern bioavailability science, and who built the proprietary tools — including an in-house AI research system — to make their formulation process faster, deeper, and more rigorous than any conventional lab.

No Western lab can match our team's depth of knowledge. No other OEM supplier in China combines PhD-level formulation expertise with a proprietary AI research system built entirely in-house.

“ This formula is the product of our doctoral team's decade of research — scientists who dedicated their careers to mastering 5,000 years of TCM knowledge and the full breadth of modern bioactive science. Our team built every tool we use — including our proprietary AI research system — to make their expertise work harder and faster. The PhDs decide. The AI assists. ”

— NuCoreBio Formulation Standard

01 Who We Are

NuCoreBio (海南纽科生物医药科技有限公司) is a formulation development and supply chain integration company headquartered in Hainan, China's only Free Trade Port. We are not a factory. We are not a broker. We are a Formula Intelligence company — the only one of our kind in the world. Our purpose is singular: to engineer supplement formulas that consumers can actually feel working — and that your competitors cannot copy.

02 The Hainan Advantage — Why Location Changes Everything

Zero-Tariff Access

Operating from China's only Free Trade Port, we access premium global ingredients at zero tariff — reducing your cost of goods by 15–30% vs. standard Chinese manufacturers. The same formula quality. Significantly better margins.

Policy-Protected Operations

Hainan FTP carries unique regulatory and tax incentives unavailable anywhere else in China. This infrastructure advantage is built into every formula we produce — and passed directly to our partners as lower COGS and faster customs clearance.

03 Our PhD Research Team — And the Tools They Built

5,000 Years of TCM. Mastered by Humans. Systematized by

Technology.

This is not a marketing claim. This is the result of years of dedicated work by our doctoral team — and the proprietary research tools they built to support it.

Over more than three years, our doctoral team immersed themselves in the complete canon of Traditional Chinese Medicine — every classical text, every pharmacopoeial record, every documented herb interaction, every synergy principle accumulated across 5,000 years of continuous human practice. To support this work, they built a proprietary AI research system to help index, cross-reference, and synthesize this knowledge at scale.

When we say ‘complete,’ we mean complete. From the Shennong Bencao Jing (神农本草经), the oldest Chinese pharmacopoeia written around 200 BCE, through the Bencao Gangmu (本草纲目) of the Ming Dynasty, through modern Chinese pharmacological research published up to the present day — our team has read, studied, and systematized all of it, with AI-assisted tools accelerating the process.

Then we combined this ancient intelligence with modern Western bioactive science: pharmacokinetics, receptor biology, clinical bioavailability research, and global supplement market trend data.

The result is a formulation engine that speaks both languages — ancient and modern — simultaneously.

100+ Iterations. 3+ Months of Validation. One Formula.

Nitro-Steel Pro EU Edition was not generated in a day.

After the AI system produced its initial formula architecture, our expert review team subjected it to more than one hundred rounds of internal validation — testing ingredient interactions, adjusting ratios, verifying EU regulatory compliance, challenging the mechanism of action at every step.

This process took over three months.

The formula you are reading today is what survived that process. Every percentage, every ingredient specification, every compliance note exists because it passed repeated scrutiny from both our AI validation layer and our human experts.

When you ask why this formula works — the answer is not luck. It is the result of 5,000 years of evidence, filtered through modern science, validated 100+ times, and engineered for exactly one purpose: producing an effect your customers will tell their friends about.

04 How Our Process Actually Works — Full Transparency

Our PhD team leads. Our AI accelerates. Results are verified by evidence.

Step 1 — AI Research Synthesis

Our doctoral team cross-references the complete canon of Traditional Chinese Medicine against modern bioavailability research and global clinical data. To accelerate this process, they use a proprietary AI research system — built in-house — that helps synthesize thousands of sources and identify candidate ingredient combinations. This is not guesswork. It is the most rigorous literature synthesis available in supplement formulation today.

Step 2 — Expert Human Validation (100+ Iterations)

Our expert review team subjects every AI output to rigorous iteration — challenging every mechanism claim, adjusting ratios against real-world dosing data, and verifying regulatory compliance at every step. The AI proposes. The experts decide. This process ran for over three months for Nitro-Steel Pro EU Edition.

Step 3 — Physical Batch Testing Before Documentation

The formula is pilot-batch produced and physically tested before any client receives documentation. The COA you receive is proof of real-world performance — not theoretical modeling. Every number in this document has been verified by third-party laboratory testing.

The PhD team leads every decision. The AI tools accelerate their research. The COA is the proof.

Don't take our word for it. Try the formula yourself — before you commit. We believe the strongest argument we can make is the product itself. That's why every qualified partner is invited to request an official pilot sample — so you can experience the full sensory timeline firsthand, before placing any order. A development fee of \$260 USD is required to initiate your sample. This covers formulation, production, and delivery — and it is fully credited toward your first order. In other words, if you move forward, it costs you nothing extra. When the sample arrives, every question about quality, texture, performance, and process is answered in 45 minutes — not by a sales call, but by the product itself. ♦ \$260 pilot sample fee — fully credited on your first order ♦ Experience the complete sensory effect before committing to MOQ ♦ Sample delivery: 5 - 10 business days after qualification No order pressure. No hidden costs. Just the formula.

05 What Sets Us Apart — The Six Pillars

01

Proprietary Formula Intelligence

We reverse-engineer viral bestsellers, upgrade the formula logic, and deliver an exclusive version before your competitors know it exists.

02

5,000-Year TCM Botanical Library

China's most complete supply chain of authenticated, standardized TCM extracts. No Western supplier can match our access, quality, or pricing.

03

04

<p>Hainan FTP Cost Advantage Zero-tariff ingredient access. 15–30% lower COGS than standard manufacturers. Every yuan saved flows directly to your margin.</p>	<p>GMP-Certified Production Network D-Grade cleanroom environments. HPLC/ICP-MS batch verification. Full traceability. MOQ from 500 units — scalable to multi-million campaigns.</p>
<p>05 Full Regulatory Intelligence Every formula pre-optimized for US FDA DSHEA and EU EFSA Novel Food. Structure/function claims, Supplement Facts panels, and compliance docs delivered as standard.</p>	<p>06 Formula IP Protection Your formula is yours. Exclusive territory licensing, full IP transfer agreements, and NDA protection as standard. No competitor in your market can access what you own.</p>

06 □ IMPORTANT — How We Work: Scarcity & Exclusivity Policy

READ THIS BEFORE YOU PROCEED.

This formula is not available to everyone. It is available to the brands that move first.

FIRST-COME, FIRST-SERVED:

Formula customization slots are limited. When a slot is taken, the next brand in that market waits. We do not rush production to accommodate multiple clients simultaneously — quality requires time, and we protect every client's timeline.

EXCLUSIVE TERRITORY RIGHTS:

Any brand that commits to a single order of 10,000 bottles or more receives exclusive territorial sales rights for this formula. This means:

- No other brand in your territory can access this formula from NuCoreBio.
- We sign a formal exclusivity agreement with a defined geographic scope.
- Your competitive moat is built in from day one, protected by contract.

Once a territory is locked — it is locked. We will not revisit this for that market.

07 Our Numbers — A Track Record, Not a Promise

<p>60+ Countries served globally</p>	<p>5,000 Years of TCM knowledge mastered by our PhD team</p>
<p>100+</p>	<p>3+</p>

Formula validation iterations	Months of AI development per formula
500 Minimum order — start small, scale fast	72H Formula proposal delivery guarantee
10,000 Bottles → Exclusive territory rights	0 Documented systemic toxicity in TCM ingredients

08 The Window Is Open. Your Competitors Are Reading This Too.

Three Forces Are Converging — Right Now.

The clean-label revolution is accelerating. Global consumers are rejecting synthetic supplements and demanding natural, transparent-ingredient, plant-based products. TCM botanicals are the strongest possible answer — and China controls the supply chain.

TikTok Shop is in its earliest growth phase. Brands with differentiated, story-driven, naturally-positioned formulas will dominate the next decade. The window for first-mover advantage is open today.

Chinese bioactives are going global. Western consumers are discovering Sea Cucumber Peptide, Reishi, Cordyceps, and Collagen Matrix for the first time. The brands that introduce these ingredients with compelling science and perceivable effects will define the category for a generation.

NuCoreBio sits at the center of all three forces. Our partners move faster, launch smarter, and build stronger brand loyalty than brands working with conventional manufacturers.

The window is open now. It won't stay open forever.

The question is not whether this formula will be in the market.
The question is whether it will be YOUR brand that takes it there.

Ready to proceed? Contact us now.

Hainan Free Trade Port, China · *"Where 5,000 Years of Chinese Medicine Meets PhD-Level Formulation Science."*

TRUST CREDENTIALS · CERTIFICATIONS & REGISTRATIONS

Our Verified Credentials

Every claim in this document is backed by verifiable documentation. Below are the active certifications held by NuCoreBio and our certified manufacturing network — all available for independent verification.

U.S. FDA Registration

Hainan Newco Biopharmaceutical Technology Co., Ltd.

FDA Registration No.: 11723993774 · Valid: 2026-12-31

Business Registration License

海南纽科生物医药科技有限公司

Registration No.: 91460000MAKYWXWU2M · Est. 2025-11-10

GMP Certificate — Intertek

Manufacturing partner: Zhengzhou Linuo Pharmaceutical Co., Ltd.

21 CFR Part 111 (2020) · Cert No.: SZ2509B6 · Valid to: Sep 2028

ISO 22000:2018 — Food Safety Management

Manufacturing partner: 中科初肽(临沂)生物科技有限公司

Reg. No.: 035FSMS2300021 · Valid to: Feb 2026 · IAF-CNAS accredited

A note on certifications — and why ours are different. NuCoreBio is not a single factory. We are the founding organizer of the China Biopharmaceutical Alliance — a network of 120 certified manufacturing partners, established by our parent company, Hainan NuCoreBio Biopharmaceutical Technology Co., Ltd. This structure means one thing for your brand: Whatever market you're entering, whatever certification it requires we have a

certified partner who holds it.GMP · FDA · ISO · HACCP · Halal · Kosher · Organic · EU Novel Food · and beyond.Whether you're launching in the US, EU, Middle East, Southeast Asia, or beyond — our alliance collectively covers the full spectrum of international dietary supplement and nutraceutical certifications. You don't need to source multiple manufacturers across different regions. One relationship with NuCoreBio unlocks the entire network.All certificates are independently verifiable via QR codes provided on each document.

PART A · FORMULA INTELLIGENCE REPORT

Complete Ingredient Architecture

Every ingredient in this formula serves a specific, documented biological role. The combination is not accidental — it is engineered to produce three overlapping physiological responses within a single serving window.

<p>Nitro-Steel Pro™ — EU Version</p> <p>0 号胶囊 · 3 capsules per serving · 30 servings / bottle (90 capsules)</p> <p> <input checked="" type="checkbox"/> EU Novel Food Compliant Certified <input checked="" type="checkbox"/> EFSA Zinc Claim <input checked="" type="checkbox"/> GMP Certified Production Network <input checked="" type="checkbox"/> No Prescription Ingredients </p>	<p>Product Specifications</p> <p>Format: Hard gelatin capsule (size 0)</p> <p>Active ingredients: 96.0% of formula</p> <p>Epimedium: Replaced with Quercetin</p> <p><input type="checkbox"/> Absolute mg dosages: NDA protected</p> <p>% composition disclosed for evaluation only.</p>
---	---

INGREDIENT	% OF FORM ULA	SPECIFICATION	BIOLOGICAL ROLE & MECHANISM	EU STATUS
L-Citrulline L-瓜氨酸	40.0 %	L-form ≥98% purity AJI92 standard	PRIMARY NO PRECURSOR. Converted in kidneys to L-Arginine → activates eNOS enzyme → nitric oxide production. Higher bioavailability than direct L-Arginine. Enters effective dose range per serving.	<input checked="" type="checkbox"/> EU
<input type="checkbox"/> Niacin IR 烟酸-即释型	3.4%	Nicotinic Acid form NOT Niacinamide <input type="checkbox"/> Proprietary IR spec · NDA required	CORE SENSORY TRIGGER. Binds GPR109A receptors in skin → triggers PGD2 release → cutaneous capillary dilation → warmth & flushing. EU dose calibrated for compliance while maintaining clear sensory signal. Onset: 20–30 min.	<input type="checkbox"/> Country limits apply
<input type="checkbox"/> Ginger Extract	10.0	Gingerols ≥10% Dry standardized extract	PRIMARY HEAT SIGNAL (EU)	<input checked="" type="checkbox"/> EU

INGREDIENT	% OF FORMULA	SPECIFICATION	BIOLOGICAL ROLE & MECHANISM	EU STATUS
生姜提取物	%		VERSION). Gingerols activate TRPV1 receptors → full-body thermogenic sensation. In EU version, Ginger is the dominant sensory driver. Synergizes with Niacin to produce sustained warmth that neither compound achieves alone.	
Quercetin 槲皮素	10.0%	≥95% purity (HPLC) Food grade, dihydrate preferred	EU-SPECIFIC PDE5 INHIBITOR. Direct PDE5 inhibition (IC ₅₀ ~3μM) prevents cGMP degradation, extending vasodilation window. Replaces Epimedium (restricted in EU). EU Novel Food: zero restrictions. Dose increased to 150mg/serving to compensate for lower Niacin.	✓ EU Novel Food
Pine Bark OPC 松树皮提取物	10.0%	OPC ≥95% Water or hydro-ethanolic extract	eNOS GENE EXPRESSION UPREGULATOR. Acts at genomic level — upregulates eNOS expression. Also scavenges NO free radicals, protecting produced NO from oxidative degradation. Plasma half-life ~5 hours — longest-acting component.	✓ EU
Korean Red Ginseng 高丽红参提取物	8.0%	Total ginsenosides ≥20% (HPLC) Steamed root extract	DIRECT eNOS ACTIVATOR. Ginsenoside Rg1 phosphorylates eNOS via PI3K/Akt pathway. Rb1 enhances mitochondrial bioenergetics. HMPC officially recognizes traditional use — strong EU claims foundation.	✓ HMPC Approved
Beetroot Extract 甜菜根提取物	6.0%	Dietary nitrates ≥2.5% (NO ₃ ⁻)	FASTEST NO PATHWAY — ENZYME INDEPENDENT. Salivary bacteria reduce NO ₃ ⁻ → NO ₂ ⁻ → NO directly. Does not require enzymatic conversion. Onset in 15–25 minutes — provides early effect before L-Citrulline peaks.	✓ EU
Black Pepper 黑胡椒提取物	2.0%	Piperine ≥95% (HPLC)	BIOAVAILABILITY AMPLIFIER. Inhibits CYP3A4 and P-gp efflux transporters — increases absorption of all co-administered compounds by 30–200%. Equivalent to a free potency upgrade for every other ingredient.	✓ EU
Zinc Gluconate 葡萄糖酸锌	0.6%	USP/EP grade Zinc ≈14%	EFSA-CERTIFIED TESTOSTERONE CLAIM. Official EU health claim Reg.432/2012: 'Zinc contributes to normal testosterone levels in the blood.' Must be printed verbatim. Provides regulatory foundation for men's health positioning.	✓ EFSA Reg.432/2012

Absolute milligram dosages per capsule are protected under NDA.

Percentage composition is disclosed for evaluation purposes only. Full specification sheet with exact dosages and production SOPs provided upon NDA execution and confirmed purchase intent.

PART B · SENSORY EFFECT TIMELINE

What Consumers Feel — and Why

This is the section that separates a formula people remember from one they forget. Every perceivable effect below has a documented biological cause. When your customer feels it working, they become a believer — and a repeat buyer.

T + 15–25 min · Stage 01

Onset — Spreading Warmth

Consumer Experience:

A spreading warmth beginning in the face, neck and ears, extending to the chest. Skin feels flushed and warm to touch. Mild tingling may be present. The consumer knows without any doubt that something is happening.

Why this happens — The Science

(1) Niacin IR binds GPR109A receptors in skin cells → triggers prostaglandin D2 (PGD2) release → cutaneous capillary dilation → the classic 'niacin flush.' In the EU formulation, dose is calibrated below Germany's BfR advisory while still producing a clear sensory signal in most individuals. (2) Beetroot's dietary nitrates are simultaneously converted via the salivary microbiome pathway ($\text{NO}_3^- \rightarrow \text{NO}_2^- \rightarrow \text{NO}$) — this enzyme-independent route is the fastest NO source in the formula, contributing to early peripheral vasodilation.

T + 25–40 min · Stage 02

Amplification — Sustained Heat

Consumer Experience:

The warmth deepens and becomes more sustained. Unlike Stage 1 which is primarily facial, Stage 2 distributes more evenly through the body. A sense of increased circulation and physical readiness.

Why this happens — The Science

Ginger Extract (TRPV1 activation) takes over as the dominant thermal signal. As Niacin's acute PGD2 flush moderates, Gingerols bind TRPV1 (the same receptor activated by capsaicin) → creates prolonged thermogenic sensation that does not fade with repeat use. In this EU formulation, Ginger is the primary heat driver — its TRPV1 mechanism synergizes with Niacin's vascular mechanism to produce a combined sensation stronger than either compound alone.

T + 45–75 min · Stage 03

Peak — Maximum Vascular Effect

Consumer Experience:

Peak of the formula's physical effect. A clear sensation of enhanced circulation and vascular fullness. Energy feels present. Physical capacity feels elevated. This is the window the consumer will associate with the product's effectiveness.

Why this happens — The Science

L-Citrulline reaches its pharmacokinetic peak. The kidney conversion cycle (L-Citrulline → L-Arginine → eNOS → NO) completes, producing maximum NO bioavailability. Simultaneously, Pine Bark OPC's eNOS upregulation amplifies the NO signal at the gene expression level. Quercetin's PDE5 inhibition prevents cGMP breakdown. All three long-cycle compounds reach simultaneous peak, creating the strongest effect window.

T + 75–150 min · Stage 04

Sustained — Extended Effect Window

Why this happens — The Science

Quercetin's continuous PDE5 inhibition prevents cGMP degradation throughout this window. Pine Bark OPC has a

Consumer Experience:

Effect maintained at stable level. No sudden drop-off. The consumer experiences a gradual, comfortable plateau rather than a cliff-edge end. This sustained profile is a key differentiator from lower-quality formulas.

plasma half-life of approximately 5 hours — its antioxidant protection of NO continues long after other compounds have metabolized. Korean Red Ginseng's Rb1 component supports mitochondrial energy production, preventing the energy dip associated with supplement comedowns.

T + 150–240 min · Stage 05

↘ **Smooth Return — No Crash**

Consumer Experience:

A gradual, comfortable return to baseline. Total effect duration: 3–4 hours. No sudden energy crash, no rebound fatigue, no discomfort. The consumer ends feeling satisfied — not depleted.

Why this happens — The Science

All compounds metabolize through natural enzymatic pathways with no withdrawal mechanism. Pine Bark OPC's extended half-life creates a gradual tail-off. The absence of stimulants (no caffeine, no synephrine) means no adrenal rebound. This smooth exit profile is a major repurchase driver — consumers associate absence of a crash with product quality and safety.

□ **Individual Variation Disclosure — Recommended for Your Label & Marketing**

"Individual sensory experience may vary depending on body weight, metabolism, food intake, and personal physiology. Times indicated represent typical ranges. Some individuals may experience stronger or more delayed responses."

Note: This disclaimer builds trust, not doubt. Brands that over-promise create returns and negative reviews. Honest ranges with scientific explanations build durable brand reputation and repeat purchase behavior.

PART C · MARKET VIABILITY REPORT

Is This Formula Worth Investing In?

□ You've just read about the sensory timeline. Now, experience it for yourself. Before you analyze the market data below—it will change the way you interpret the data.

Three questions every brand owner needs answered before committing. The data is below.

\$8.4 Billion — Global Men's Health Supplement Market - 2024

Growing at 8.9% CAGR through 2030. The EU market accounts for approximately \$2.1B of this total, with Germany, UK, and France as the top three markets.

The NO-pathway ('pump') subcategory has shown 340%+ growth on social commerce platforms over 24 months.

Men's performance is the fastest-growing supplement category globally — and the sensory-effect segment is growing at 2–3x the category average.

340%

Growth of NO-pathway supplements on TikTok Shop US (2023–2024)

67%

Repurchase rate for sensory-effect formulas vs. 23% for neutral products

\$2.1B

EU men's health supplement market 2024, growing 7.2% annually

82%

Men's performance purchases influenced by peer recommendation or social content

Profit Model — Conservative Estimate (EU Market, 500 Bottle Launch)

Item	Unit Economics	Notes
NuCoreBio Production Cost (500 bottle MOQ)	\$4.80–\$6.20 / bottle	Includes capsules, bottle, label, COA
Suggested Retail Price (EU e-commerce)	€38–€52 / bottle	Based on comparable EU market positioning
Gross Margin (at €42 retail)	~72–78%	Before marketing & logistics
Minimum Order (first batch)	500 bottles	Capital requirement: ~\$3,000–\$3,500
Revenue at 500 bottles sold	€19,000–€26,000	Conservative 3-month window
Expected repurchase rate	55–67%	Industry avg. for sensory-effect formulas

PART D · BRAND LAUNCH BUSINESS PLAN

From Zero to First Sale — 90 Days

A practical, step-by-step roadmap for brands entering the EU men's performance supplement market with a minimum viable budget.

01

Days 1–14 · Setup Phase**Foundation: Formula Lock + Brand Identity**

- ◆ Sign NDA with NuCoreBio → receive full specification sheet with absolute dosages
- ◆ Confirm MOQ (500 bottles minimum) and place production deposit
- ◆ Register EU business entity if not existing (required for Amazon EU seller account)
- ◆ Commission label design — NuCoreBio provides free main image & detail page design
- ◆ Select primary EU market (recommend: Germany or UK for first launch)

02

Days 15–35 · Production Phase**Production + Pre-Launch Content Creation**

- ◆ NuCoreBio produces batch — timeline: 14–21 days from deposit confirmation
- ◆ Receive product sample for photography and video content creation
- ◆ Create 10 core TikTok/Reels videos: sensory effect demo, ingredient explanation, before/after
- ◆ Write Amazon listing copy using EFSA zinc claim and HMPC ginseng claim as compliance anchors
- ◆ Identify 5–10 micro-influencers in target market for gifting (NuCoreBio provides sample support)

03

Days 36–60 · Launch Phase**Market Entry + First Sales**

- ◆ Product arrives — quality check against COA before activation
- ◆ Activate Amazon listing with optimized A+ content and keyword strategy
- ◆ Launch TikTok content — lead with niacin flush/warmth demo video (highest engagement format)
- ◆ Send product to influencers — genuine sensory reaction videos are the most powerful UGC
- ◆ Target: 30–50 units sold in first 30 days, minimum 5 verified reviews

04

Days 61–90 · Scale Phase**Optimization + Reorder Planning**

- ◆ Analyze first 30 days: which content drove most traffic, which keywords converting
- ◆ Double down on highest-performing content format — scale ad budget on proven creative
- ◆ Collect customer feedback — sensory experience reports are your strongest testimonial content
- ◆ Place reorder with NuCoreBio (recommend 1,000–2,000 bottles for Month 2)
- ◆ Activate email/WhatsApp repurchase sequence — target 55%+ repurchase rate by Month 3

This Formula is Available. Your Territory May Not Be.

Exclusive territory licensing is available — first confirmed order of 10,000 bottles locks your market.

Once a territory is closed, we will not reopen it for that formula. This is not a sales tactic. It is our policy — and it is what makes the exclusivity real.

What you get when you reach out today:

- ◆ Free formulation consultation — no commitment required
- ◆ Free sample — experience the sensory effect before any order
- ◆ Full pricing and MOQ breakdown for your target product
- ◆ Regulatory compliance summary for your target market
- ◆ Exclusive formula proposal delivered within 72 hours

Mc5896538@outlook.com WhatsApp: +86 158 6692 0149
